

12TH ANNUAL WORLDWIDE GIS DAY
“DISCOVERING THE WORLD THROUGH GIS”

SPONSORS AND EXHIBITORS INVITATION

ALAMO AREA GIS USER GROUP & SCAUG
GIS DAY SAN ANTONIO 2011

A GIS is a geographic information system. GIS helps people think spatially and approach problems from a geographic perspective. GIS integrates hardware, software, and data to help people understand a wide variety of information about our world. This data is typically viewed on a map, which provides an advantage because maps reveal patterns, point out problems, and show connections.

On GIS Day 2011, GIS technology users will again open their doors to schools, businesses, and the general public to showcase real-world applications of this extraordinary technology. Users will host a variety of educational events and showcases that will allow people to see and experience GIS and its extensive applications and benefits firsthand.

San Antonio GIS Day hosts a variety of organizations sharing their insights and expertise in GIS technology. Our focus this year is our educational initiative, with presentations dedicated to K-12 education throughout the day. As such, this year we are waiving sponsor/exhibitor fees and invite all interested exhibitors to showcase their GIS capabilities at no cost (a charitable donation may be made to help with event expenses). A professional networking presentation will be provided for exhibitors to offer participants and sponsors a chance to meet others in the GIS community, catch up on the latest technologies, and introduce their services to a new market. Come see how GIS is used, get project ideas, and meet new colleagues on GIS Day 2011.

Date: November 18, 2011
Time: 8:30 a.m. to 2 p.m., K-12 Education
Professional networking program
(Agenda to be posted soon)
Venue: NEISD Community Education Center
8750 Tesoro Dr.
San Antonio, Texas 78217
